## A Fast-Food Franchise Ordered Big Savings and Better Performance

01

### Overview

A fast-food franchise with 78 locations in California was upgrading its POS systems and implementing Meraki MX64s at each site.

02

### Challenge

- The franchise faced increasing POTS pricing and expiring promo rates for circuit pricing.
- The objectives were to save money, improve services, and provide for franchise bandwidth requirements.

03

### Solution

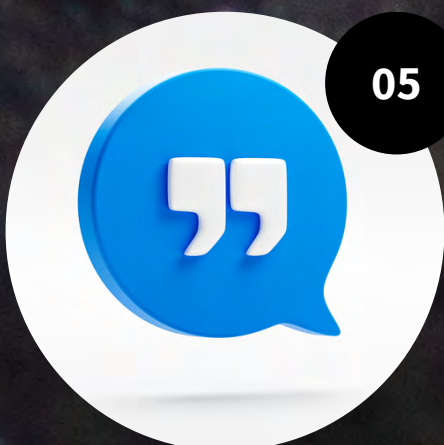

- The solution involved using hosted UCaaS and POTS only where necessary.
- EnTelegent improved Internet speeds and implemented 4G LTE backup at all locations.
- MNS Monitoring was also implemented to increase resiliency and ease of administration.
- To drive payback NRCs were amortized.

04

### Result

- A Monthly Savings of \$4,105 (17.1%)
- A 3-Year Savings of \$148,000

05

### Feedback

"The Client appreciated the fact that our proprietary AI engine allowed EnTelegent to provide three different options with side-by-side analysis."

- Tom Turpin, CEO, EnTelegent Solutions
