

# CASE STUDY MINI

*Connectivity, MNS Monitoring, and EnVision*

## Healthcare Technology Solutions that Pay for Themselves

### Challenge

A mammography and diagnostic services provider needed help lowering connectivity costs and improving the efficiency of their accounting and troubleshooting processes.

### Solution

EnTelegent Solutions provided the Client with low-cost Access circuits, monitoring with remediation, centralized circuit inventory, and a single consolidated bill.

### Result

- Lower costs were achieved through circuit migration.
- Processing-related late fees were eliminated.
- The efficiency of invoice and accounts payable management was improved.
- By relying on EnTelegent's solutions and support, the Client freed up resources, allowing them to better focus on providing healthcare services.

### Feedback

"EnTelegent's capabilities added significant value for my customer while allowing our firm to expand our position/revenues with the client."  
- EnTelegent Partner, Midwest
