

# CASE STUDY MINI

*Connectivity, MNS Monitoring, EnVision, International Field Services, Global Project Management*

## Manufacturing Technology Solutions for Wherever The Road Takes You

01

### Overview

A global automotive manufacturer and retailer with a Tier 1 provider wanted to migrate from legacy MPLS to SD-WAN to improve scalability, lower costs, and increase network performance visibility.

02

### Challenge

- A global, centralized solution for 120 sites distributed worldwide that would integrate seamlessly with their MSPs systems.

03

### Solution

EnTelegent Solutions provided Connectivity (DIA & Broadband), MNS Monitoring, EnVision Life Cycle Management, International Field Services, and Global Project Management.

04

### Result

- The Client was able to scale freely.
- They saved 40% over the previous spend.
- They now have a global NOC, a Secure Web Portal, Centralized Inventory, and Consolidated Billing.

05

### Feedback

"EnTelegent's ability to competitively source, deliver, and support Connectivity globally made them the best choice for our Client. The communication and white glove project management are much appreciated."  
- EnTelegent Partner, Midwest
