

CASE STUDY

Integrated Home Healthcare Connectivity Solutions

THE CHALLENGES

This Home Healthcare start-up did not have any existing connectivity services in place. They need scalable nationwide access with failover and they needed to get up and running quickly to support small office set-ups.

With employees working from patients' homes, they also required Mi-Fi and a data plan for their 600+ corporate tablets that would work seamlessly and dependably anywhere in the country.

THE SOLUTION

EnTelegent Solutions:

- Quickly procured and installed reliable low-cost Broadband circuits including LTE with a Peplink router at each site.
- We also supplied MiFi devices and ENTELE-SIM Filtered, Unlimited Wireless Internet to support the client's existing corporate cellular devices
- Finally, we implemented Monitoring via our US-Based NOC

BENEFITS

Fast Turn-Up of Critical Connectivity

Our experienced, knowledgeable team and longtime relationships with 80+ providers allowed us quickly and smoothly execute on the client's immediate circuit and deployment needs. The entire project from start to finish took 10 days. The MiFi devices and ENTELE-SIM offering provided the client with seamless cellular coverage nationwide from multiple carriers, all on one consolidated bill. In addition, with our Managed Services, the client is assured of proactive troubleshooting and repair of their infrastructure.

AT A GLANCE

Solution Mix

- Access (Broadband & LTE Backup)
- MiFi Devices & ENTELE-SIM
- Managed Services (Monitoring, NOCaaS)

Benefits

- Speed & Agility, 10 Day Turn-Up
- Failover
- Seamless Cellular Device Connectivity Nationwide
- Worry Free Managed Infrastructure

"EnTelegent continues to meet and exceed client expectation for responsiveness and project management. They seamlessly enabled our client's office rollout."
