

CASE STUDY

## Manufacturing Technology Solutions for Wherever the Road Takes You

### THE CHALLENGES

The client, a global automotive industry manufacturer, and retailer wanted to migrate from its legacy MPLS network with a Tier I provider to an SD-WAN solution. They required scalability, lower costs, and improved network performance visibility.

With 120 corporate sites widely disbursed across North America, South America, Asia, Europe, and Africa - the client needed a global, centralized solution.

In addition, the solution also had to integrate with their Managed Service Provider's systems.

### THE SOLUTION

EnTelegent Solutions provided the client with:

- Diverse Access including one hundred circuits up to 1 GB as the primary; High Capacity Broadband as the secondary (or DIA at some critical sites)
- Proactive Monitoring/Management (NOCaaS)
- Centralized Circuit Inventory
- One Contract
- One Consolidated Bill
- One Secure Web Portal

### BENEFITS

#### Scalability, Lower Costs, Visibility

EnTelegent Solutions implemented the client's migration which will enable them to scale freely, saving them 40% versus their previous spend. EnTelegent also empowered them with a global NOC, a secure web portal for visibility, and consolidated billing.

### AT A GLANCE

#### Solution Mix

- Access (Broadband & DIA)
- Managed Network Services (Monitoring, NOCaaS)
- International Services
- Global Project Management

#### Benefits

- 40% Savings vs Previous Spend
- Peace of Mind Gained from a Global NOC
- Single, Secure Web Portal Visibility
- Consolidated Billing
- SD-WAN Scalability
- Seamless Integration

*“EnTelegent's ability to competitively source, deliver and support diverse internet access globally made them the best choice for our client's needs. The communication and white glove project management are much appreciated.”*
