

SD-WAN & MANAGED INFRASTRUCTURE

EnTelegent Solutions delivers complete SD-WAN end-to-end management and support solutions. We Consult, Design, Stage, Deploy and Manage SD-WAN as required - including 24/7/365 NOC Operational Support and Incident/Change Management.

We take the time to understand exactly what your requirements are and assist where needed in the design of a solution that aligns with your business and performance objectives.

- Tom Turpin, CEO EnTelegent Solutions

CISCO MERAKI, FORTINET & CATO NETWORKS CERTIFIED
(With the Ability to Manage Others Such as Palo Alto via Our Portal)

ADDITIONAL NETWORK MANAGEMENT SERVICES

- *Circuit (Including 3rd Party)*
- *Switch/AP/Server*
- *IoT Device*
- *Integrated Polling/Data Gathering, Reporting, and Ticket Management for Circuits and CPE via our Portal*

SECURE WEB PORTAL

EnTelegent's comprehensive Secure Web Portal consolidates all your service provider portals into a single, user-friendly management tool for API Integration, Monitoring, Alerting, Ticketing, and Reporting including Latency, Packet Loss, SLAs, and more.

DEDICATED PROJECT MANAGER

As part of our SD-WAN process, we partner you with an experienced, dedicated Project Manager, who serves as a single point of contact to handle logistics, and provide oversight for all configuration, deployment coordination and Engineering assistance.

DOMESTIC & GLOBAL FIELD SERVICES

In addition to our internal resources, we maintain an extensive network of domestic and international technicians in 160+ countries to perform SD-WAN and network installations. All installations are remotely supported by EnTelegent's Network and SD-WAN Engineers.
