

ADOPT AI WITH CONFIDENCE

AI Security for 3rd Party LLMs, Proprietary AI Apps, and Agentic AI

AI is driving innovation across every organization, but rapid adoption often outpaces governance, visibility, and security. EnTelegent's AI Security, in collaboration with Cato Networks, helps organizations reduce risk, protect sensitive data, and establish the controls needed to securely scale AI initiatives.

AI SECURITY

From AI Discovery to Secure AI Adoption

We help organizations discover, govern, secure, and optimize AI usage across the enterprise.

Successful AI adoption requires more than technology. It requires visibility into AI activity, governance frameworks that align with business objectives, and security controls that protect data, applications, and users.

EnTelegent combines AI-native security technology with advisory services, implementation expertise, ongoing monitoring, and white-glove support to help organizations safely scale AI initiatives across their business.

AI Discovery & Visibility

Gain visibility into AI usage, risk exposure, and Shadow AI activity.

AI Governance & Policy Management

Create governance frameworks that align AI adoption with business objectives.

AI Risk & Data Protection

Reduce risk by protecting sensitive data across AI applications and workflows.

AI Monitoring & Optimization

Maintain ongoing oversight to support secure and scalable AI adoption.

Complete Visibility

Identify AI activity, usage patterns, and risks.

Reduced Risk

Protect data and strengthen AI governance.

Faster Adoption

Enable secure AI innovation at scale.

Expert Guidance

Expert support throughout your AI journey.

WHY CHOOSE ENTELEGENT?

Technology alone won't solve AI governance challenges.

EnTelegent combines AI-native security technology with strategic advisory services, implementation expertise, and ongoing support to help organizations securely adopt, govern, and scale AI initiatives.

From discovery and governance to protection and optimization, we serve as an extension of your team—helping you maximize AI's value while reducing risk.

✓ Advisory ✓ Governance ✓ Implementation ✓ Support
